Summary

Computer Engineering graduate and Frontend Developer specializing in building high-performance, scalable web applications. Proven track record in optimizing React applications, reducing load times by up to 75%. Strong foundation in data structures and algorithms with a focus on writing clean, maintainable code and collaborating in agile environments.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, ReactJS, Next.js, Angular, Tailwind CSS, Bootstrap

Backend & Database: Node.js, Express.js, .NET, SQL Server, MySQL, MongoDB, Firebase

Tools & Devops: Git, GitHub, VS Code, Figma, Google Cloud Platform, Android Studio, Postman, Multer

Other Languages: C++, C#, Java, Python, Dart, Liquid, Assembly

Experience

Frontend Developer

2026

Nova Team (Lumos Platform)

Alexandria, Egypt

- Engineered a full-featured web platform with a custom-built **AI chatbot** (real-time responses, markdown parsing, AR/EN support).
- Implemented performance optimizations (lazy loading, efficient rendering) and integrated Vercel Analytics for user behavior tracking.
- Led the team to the Top 30 out of 350+ teams in the **Huawei Developer Competition 2025 Northern Africa**.
- Secured 4th place out of 50 teams at the **Delta City Hackathon (DCH)** by pitching and presenting the platform's architectural viability.

Part-time Frontend Developer

2025

Baghdouda Solutions (Startup)

Alexandria, Egypt

- Developed a role-based e-learning platform (Nour Al-Eman) using **Agile** methodologies to deliver features 20% ahead of schedule.
- Refactored key components to enhance performance, achieving up to 75% faster load times and 50% fewer re-renders.
- Impact: Eliminated 100% of redundant API calls via caching and boosted Time to Interactive (TTI) by 50-100%.

PR Core Team Member

2023

GDSC BHI-47

Alexandria, Egypt

- Demonstrated **persistence** in negotiating with 15+ service providers, reducing event overhead costs by 15% for IWD'24.
- Collaborated in a **cross-functional team** to secure 5+ strategic partnerships, increasing event funding by 30%.

Projects

Portfolios Dashboard | *React, TanStack Query, Axios, Tailwind CSS / Node.js, Express, MongoDB, JWT* 📄 Sep 2025

- Built both sides of the stack — a secure Express/MongoDB API (10+ endpoints, JWT auth, RBAC) and the React dashboard consuming it. Used Axios + TanStack Query for full async state: caching, background refetching, and deduplication — 60% more efficient than manual DB workflows.
- Validated 100% of frontend-backend request flows, ensuring complete data integrity across all endpoints.

Education

Bachelor of Computer Engineering

Sep 2021 – jun 2026

BHI-47 (GPA: 3.1)

Bihera, Egypt

Relevant Coursework

Data Structures, OOP, Algorithms Analysis, Database Management, Computer Architecture, System Programming, Network.
